# barpa

Instruction Manual

Keystone Jack - UTP 22-26 AWG
90º/180º Way Out

1 Strip approximately 40 mm of the cable jacket.

2 Separate the wire into 4 pairs. Cut off the cross filler by diagonal plier.

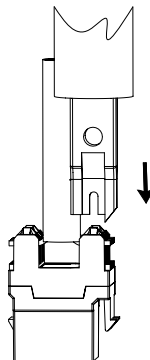

40 mm

3 Insert the wires into the keystone holes according to TIA568A/B wiring instruction label and cutflush.

We recommend that you place the cable by establishing an angle of 90º between this and keystone before you insert the wires into the Keystone holes.
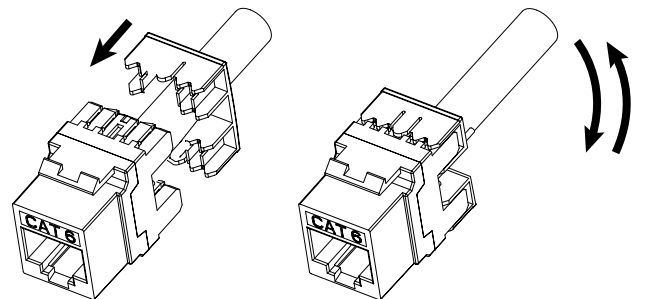

For a better insertion of the wires into the keystone please use a krone/110 IDC tool.

4 Take the plastic cap through the solid cable and cover the keystone jack.

The plastic cap can be used for left or right way out.

Done! Good Job!
